

HECO-FIX-plus® – the top quality multipurpose screw with impressive product characteristics

The ideal multipurpose screw for all types of wood

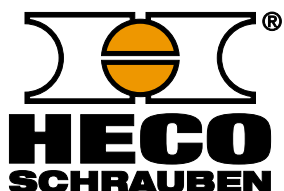

The ideal all-rounder for almost every building trade application

The new, enhanced HECO-FIX-plus® has many benefits that will make your work much easier and more effective.

- A screw for almost every application
- Ideal for all natural and industrial wood materials, plastic, masonry and thin metal sheet up to 2 mm thick
- Can be combined with nylon plugs
- HECO-FIX-plus® Multi-Material Screws made from A2 stainless steel can be used in hard wood without pre-drilling
- Good unscrewing results from wood and masonry
- Minimum driving torque (30% lower) thanks to the innovative combination of waxed coating and serrated thread
- Patented serrated thread profile
- Different packaging systems for all requirements
- Approved, monitored product

for almost every application*

Safe and secure

HECO-FIX-plus® – the patented Multi-Material

for professional use in almost every material

The new, enhanced HECO-FIX-plus® Multi-Material Screw is ideally suited for use in all natural and industrial wood materials, and in masonry, plastic and sheet metal up to 2 mm thick. You will find the right screw for every application in the comprehensive product range.

The HECO-FIX-plus® Multi-Material Screw has a patented serrated thread at the tip of the screw, and an additional waxed coating reduces the driving torque to a minimum. At the same time, high tensile loads can be transmitted. Unscrewing is also reliable and problem-free. Furthermore, thin sheets of metal up to 2 mm thick (e.g. in sandwich elements) can be screwed through without any difficulty.

The HECO-FIX-plus® can also be driven into concrete, brick and aerated concrete, either direct or with a plug. The screw's excellent driving characteristics in plastics and aluminium profiles make it even more versatile.

The HECO-FIX-plus® Multi-Material Screw is available in steel with zinc and clear finish or zinc and yellow finish, and in stainless steel, with full thread or part thread. Many different head types are also available for Pozidriv and T-Drive.

This screw is the ideal multipurpose screw for both professionals and DIY enthusiasts, and can be used with almost any material.

The HECO-FIX-plus® Multi-Material Screw has a patented serrated thread which, together with the waxed coating, provides minimal driving torque.

You are always on the safe side with this screw thanks to its building regulation approval for connecting wood materials and its special approval for roof rafter insulation.

The HECO-FIX-plus® Multi-Material Screw is the perfect choice for all natural and industrial wood materials – and it's just the job for plastic profiles and sheet metal up to 2 mm thick (e.g. in window construction).

Suitable materials

Bangkirai

Chipboard

Oak

Aluminium

Plywood

Solid wood

MDF board

Plastic

Masonry

bulk packs

We can also offer you a wide range of storage systems with suitable POS retailing aids. Our practical metal assortment cases are extremely popular with DIY enthusiasts.

A NEW GENERATION

Impressive new product characteristics

- The new HECO-FIX-plus® has an entirely new tip
- The serrated thread has been extended up to the tip, which means that the screw can now be used for many additional purposes.
- The combination of the new tip design and the tried and tested waxed coating produces minimal driving torque.

This multipurpose screw puts you firmly in the driving seat and should be part of your basic equipment – Safe and secure.
