

One group, one industry

- **7,500 m³** of round wood sawed daily.
- Production consists mainly of spruce, Douglas fir, larch and pine.
- **Local sourcing** of raw materials.
- **Direct purchasing and management** of standing timber.
- Enrolled in the process of sustainable management of forests (PEFC, FSC).
- **Delivery throughout Europe** : by road, train or boat.
- **Flexible and integrated logistic department.**
- **Cogeneration** : on-site recycling of by-products.

Many added value procedures

- Cross re-cutting with millimetre accuracy.
- Dipping in 3 colours (yellow, green, colourless) - class 2.
- High-speed planing.
- Shaping to order, all sizes.
- Computer-controlled drying.
- Autoclave impregnation (brown or green) - class 3 or 4.
- Bonding which meets international certifications.
- Re-packaging of products.

Our certifications :

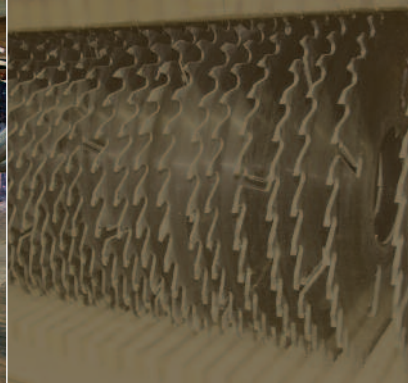

Mastery of the timber industry

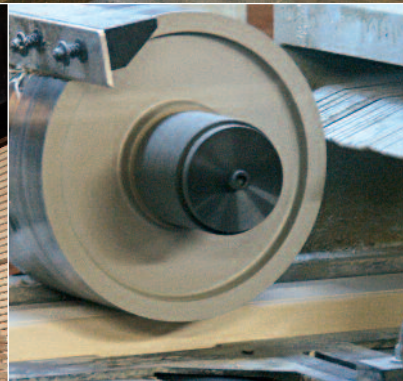

Planing / shaping

Dipping

The **Fruytier Group** has fully mastered the promotion of the timber industry from sourcing to delivering finished and added value products.

Our services combine **sawing, grading, CE marking, precision re-cutting, industrial drying, planing and moulding, dipping, pressure impregnation, glueing and fingerjointing.**

9 sawing lines

25 drying units

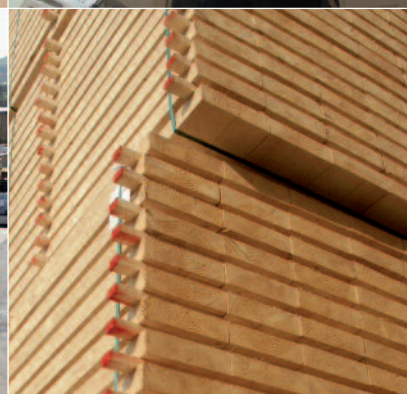

Glueing

Cross cut saw

3 impregnation tunnels of 24 m

Diversified production

- **Finished products** : planed/shaped timber, dried, treated by dipping or by impregnation (garden timber),...
- **Engineered wood (composites), finger-jointed (double-triple), glulam,...**
- **Structural timber** : traditional, industrial, battens, rafters, planks, FLS,...
- **Packing timber.**

- ⇒ Immediate availability of standard products.
- ⇒ Flexibility : orders made to customers specification.

Unique service

The **Fruytier Group** is able to supply very large quantities of fresh wood from the forest, directly and quickly.

Sawing, standard and to order, offers a flexible response to customer needs.

- **Grading and marking of timber** using high technology (laser, x-ray...etc.) - CE, C18, C24.
- **Dryers equipped with sensors** that monitor humidity and air circulation.
- After drying the timber is re-packaged to cut down on logistic costs.

- **Certifications for wood treatment** : class 2, 3 and 4.
- **Approved treatment and bonding products.**
- **High temperature treatment** of packing timber (ISPM 15).
- **Identification and traceability** of the wood.
- **Individual labelling.**
- **Wrapping.**
